

Project: Nstein

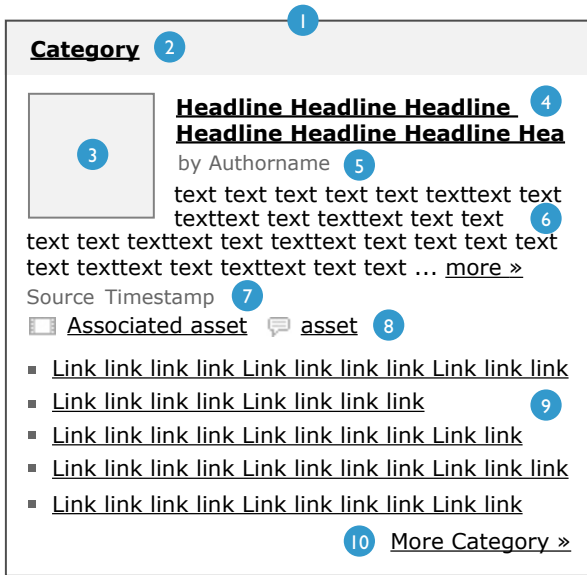

Deliverable: Category List Module v0.1

March 10, 2009

Author: Matt Glass

Category List Module

Automatically populated categorized list module.

1. Module border can be modified through CSS to meet site's needs.
2. Category title, optionally linked to category section page (if available.)
HTML text of graphic.
Category title bar background can be altered through CSS.
3. Optional thumbnail 64 by 64px
Linked to featured headline #4
Only displayed if asset associated with featured headline exists (if not text shifts left.)
4. Featured headline.
Full headline can wrap to multiline if necessary.
5. Optional author's byline.
6. Featured headline abstract.
First ### characters of article.
Text should truncate, add ellipses and round down to the nearest full word.
Additional link to read more added after ellipses.
7. Featured headline #4 source and timestamp.
8. Associated assets.
9. Category specific links.
Can wrap to multiline.
Number of links to display will be configurable per module instance.
10. More in this category link.
Links to category specific section page (if available.)

Examples

As a list element on section pages (ala newstimes.)
