

Project: Nstein

Deliverable: Headline List Module v0.2

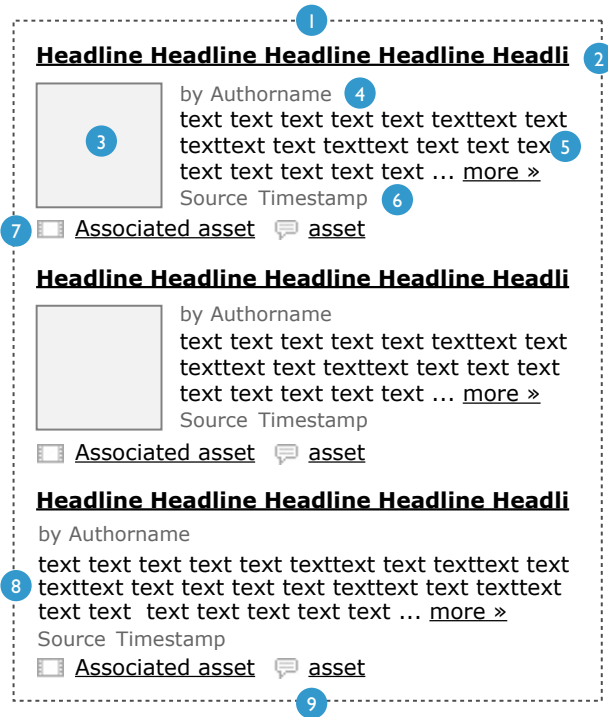

April 9, 2009

Author: Matt Glass

Headline List Module

I. Automatic

Automatically populated list module.

1. Module border can be modified through CSS or turned off depending on site's needs.
2. Headline/item link.
Can wrap to multiple line as needed.
3. Optional thumbnail 64 by 64px
Linked to headline/item URL #2
Only displayed if asset associated with headline exists (if not text shifts left, see #6)
4. Author(s) byline.
Associated byline to #2. If not present row collapses (see examples.)
5. Featured headline abstract.
First ## characters of article.
Text should truncate, add ellipses and round down to nearest full word.
Additional link to read more added after ellipses.
6. Source and timestamp
7. Associated assets.
Assets explicitly related to the headline #2.
Editor can configure which assets to display (icons are pulled in automatically) but item is only displayed if the actual asset exists.
8. If no thumbnail asset exist text shifts left.
9. Number of entries to be displayed will be configurable per module instance.

Examples

Set up once at runtime, content populates module automatically depending on configuration settings.

Module configured to show all.

2. Manual

Each individual item selected by editor:

1. Module border can be modified through CSS or turned off depending on site's needs.
2. Headline/item link.
Can wrap to multiple line as editor sees fit.
3. Optional editor selected thumbnail image 64 by 64px.
Optional border treatment controlled through CSS.
Linked to same URL as the #3.
4. Author(s) byline.
Editor can choose to display this data, it is read in automatically if selected.
5. Editor created teaser text.
Ability for editor to add sub links within teaser text.
6. Article source and timestamp.
Editor can choose to display individual pieces of data (i. source, ii. timestamp), each is read in automatically if selected.
7. Optional editor selected associated assets.
Assets explicitly related to #2.
Editor can select which assets (icons are pulled in automatically) but item is only displayed if the actual asset exists (see centerpiece wireframe for list of supported assets.)
8. Optional related links.
Optional bullet at the beginning of each row.
Each row can be subdivided into separate links if needs be.
Link delimiter to follow property specific look & feel.
Optional icon can be associated with each link, also linked to associated link URL.
Number of additional rows to be left to editor's discretion.
9. Number of entries to be displayed will be left to editor's discretion.

Example

Headline list commonly found on homepages.
